<u>THE BLACK PANELS CAN ONLY BE BLACK</u>			

The harness comes complete with one Austrialpin HG steel carabiner.

There are four loops for towing: two for aero towing and two for winch towing. The camera pocket, radio pocket and dragchute container are located on the opposite side of the rescue parachute container. The dragchute container is on the left side behind the rescue parachute container.

Please take all measurements with light clothes on (T-shirt, jeans and trainer shoes) and write them into the boxes.

IMPORTANT: the difference between the total height and the shoulder height should be from 26 to 32 cm. If not, the measurements are probably wrong and you must take them again!

To avoid having too wide a harness, please take:

- the chest measurement 5 cm below the armpit at the nipple level
- the hip measurement around your bottom

RESCUE PARACHUTE CONTAINER	LEFT	RIGHT
----------------------------	------	-------

DROGUE CHUTE	YES
--------------	-----

FIT (personal taste)	NORMAL	TIGHT	LOOSE
----------------------	--------	-------	-------

Standard: a single strap sliding on a rope integrated in the back board.	
---	--

Friction: Standard system with an extra friction device on the main attachment that works on a thin rope fixed at both ends of the back board.	
---	--

Inside Trim: the "angle of dangle" can be changed using an inside lever.	
---	--

PTS: the "angle of dangle" can be set pushing your feet against the foot board.	
--	--
